How do I update Group Policy on my Windows computer?

Tell Me

It is important to connect your university owned computer to VPN on a monthly basis in order to receive the latest Windows computer policies.

To manually receive the latest computer policies, follow these steps. If off-campus, connect to the VPN first.

1. Click the Search icon

2. Type CMD and click Run as administrator

3. Type `gpupdate /force`
4. Restart your computer
