How can I see all cards when searching by 800#?

Tell me

DNA Fusion will only show old 800# cards when repeating queries. Use a custom query for new ISO cards. An EMPID has been created for this situation.

1. Open the personnel browser

2. Right-click “All Cardholders,” select “Repeating Queries > Custom > EMPID”

3. You can now search by 800#
4. Double clicking on the personnel record will show all of the cards

5. Final step
