EHS Compliance Training

The Office of Environmental Health and Safety (EHS) offers online and classroom environmental health and safety training at no cost to most UNC Charlotte departments. Local, State and Federal regulatory requirements and UNC Charlotte injury prevention policies require employees to receive general and specific safety training to maintain an environment free from potential health and safety hazards.

ALL EMPLOYEES must complete these state-required training sessions in Cornerstone at Learning & Organizational Development website by March 31 of each year:

- Building Emergency Evacuation Training
- Fire Safety and Prevention

Access training by using your NinerNET credentials to log in at Learning & Organizational Development website.

These trainings are required annually.
