How do I run a virus scan on my personal computer with Sophos antivirus?

Tell Me

Sophos is available for personally owned Windows and Mac computers. Tetra is used on University Macs. See this FAQ for installation details.

If you think you have a virus on your computer, you can force Sophos to scan your entire system.

1. Click on the Sophos icon in the menu bar along the top right
2. Click Open Scans...
3. Click the Scan Now button

Note

If you find a virus on your University computer, please contact the IT Service Desk for assistance.
