What is a Subject Alternative Name (SAN) and how do I submit multiple SANs?

Tell Me

1. **Subject Alternative Name (SAN):** SANs allow you to protect multiple host names with a single SSL certificate.
2. If your server has more than one alias, we can add a SAN, or multiple SANs, to your certificate to insure that certificate mismatch errors do not happen.
3. Submitting a CSR with multiple SANs:
   a. When you submit your certificate signing request you will need to select under certificate type **InCommon Multi Domain SSL (SHA-2)** and add the SANs under the common name.

   ![Certificate Signing Request Form]

   - **Certificate Type:** InCommon Multi Domain SSL (SHA-2)
   - **Certificate Term:** 2 years
   - **Server Software:** OTHER
   - **CSR:**
   - **Common Name:** test.uncc.edu
   - **Subject Alternative Names:**
     - test.its.uncc.edu
     - its.test.uncc.edu
