Change of Major Process

Non CCI students (University College Students or Students in other Majors): Students must meet the current internal transfer requirements described on the CCI Advising Center website. Students will also need to attend a change of major workshop. The schedule for those workshops are also on the CCI Advising Center website.

Computer Science students wishing to change their concentration should consult with their assigned advisor before doing so. The student or advisor may send the request for the concentration change to Katie Dunn in SiS or Kevin Parsons, Director of CCI Advising.

The entire process for the change to show in Banner may take up to one week.
